December 13, 2023, **13:00-14:30 CET** (14:00-15:30 IST), ZOOM
Moderation: Carsten Ovens, CEO, ELNET (DACH)
Registration Link: *https://elnetwork-eu.zoom.us/meeting/register/tZModeqtrj4sHdyt7PJkub6ogLyUtGK1kx5I*

Topic: GIHF-AI Digital Mental Health Table: Coping with trauma in times of war and beyond

This roundtable is hosted by the European Leadership Network (ELNET) following the brutal attack by Hamas on Israel on October 7, 2023. In the aftermath of it, the entire country is suffering under this traumatic event and the ongoing war against Hamas. The impact on Israel's healthcare system, particularly in the realm of Mental Health, is profound. ELNET has been fostering connections between the German and Israeli healthcare ecosystems through its German Israeli Health Forum for Artificial Intelligence (GIHF-AI) since 2021, with the goal of mutual support and learning.

Therefore, this event on Digital Mental Health aims to assess both the immediate and future needs of Israel in the context of expected pathologies and available therapies, also taking into account the availability of medical personnel. The focus will be on sharing German expertise, experiences, and approaches, specifically within the mental health ecosystem, digital mental health applications, study results, and relevant use cases. Additionally, the objective is to explore ways in which German health experts and institutions can offer practical support to their Israeli counterparts during these critical times.

13:00h: **Welcome and Introduction**
- Carsten Ovens, CEO, ELNET (DACH)

13:05h: **Mental Health Care in Israel during War and beyond**
- Prof. Dr. Ran Balicer, Chief Innovation Officer (CIO), Clalit Health Services
